

PANTA V20 Test Evidence Report

PANTA Product and Engineering

27 August 2026

Contents

1	Result	1
2	Category summary	1
3	Acceptance coverage	2
4	Browser evidence	2
5	Machine-readable evidence	2
6	Production qualification	2

1 Result

Status: PASS

Passed: 49 / 49

Failed: 0

Tests the bundled V20 frontend, three synthetic fixture packs, typed schemas, pure compiler and transition adapters, and the stateful Mock Connected reference API. It does not certify production authentication/RBAC, a production Case Store, a live autonomous research service, external human contact, external effects, or Anto's separate production runtime.

2 Category summary

Category	Pass	Fail
ADAPTERS	2	0
AUTHORITY	4	0

SCHEMAS	2	0
SETTLEMENT	2	0
SPINE_GOVERNANCE	1	0
SYNTAX	1	0
TECHNICAL_VALIDATION	1	0
TEMPORAL	3	0
VENTURE_FINANCE	1	0
VENTURE_GRAMMAR	1	0

3 Acceptance coverage

The suite verifies release identity, three-case generalisation, fixture-free core, confidential-safe resynthesis, venture grammar, speaker-level provenance, epistemic separation, bitemporality, discrepancy generation, deterministic derivations, AI-hypothesis gating, governed missions, cap-table arithmetic, technical validation envelopes, Lens purity, typed schemas, pure adapters, institutional-act classification, mode honesty, replay, spine authority, Human Stops, blocked partial settlement, idempotency, execution failure and browser rendering.

4 Browser evidence

Eleven screenshots are generated by the Playwright acceptance flow:

1. Deal Command venture archetype;
2. native interactions;
3. Utterance Object Aperture;
4. Compiler Review;
5. validation envelopes and conditions;
6. Unknowns and missions;
7. venture financing;
8. replay;
9. Human Stop;
10. blocked component;
11. mobile read/review.

See 08_TEST_EVIDENCE/browser/ and 03_SCREEN_ATLAS/07_V20_VENTURE_EXTENSION/.

5 Machine-readable evidence

- V20_TEST_RESULTS.json
- V20_TEST_RESULTS.txt
- V20_TEST_RESULTS.md
- run_v20_tests.py

6 Production qualification

A passing suite certifies the packaged synthetic reference implementation only. It does not certify production identity, enterprise tenancy or persistence, live research, external human contact, external delivery, Fabri's production compiler/Case Store or Anto's separate production Transition Engine.
