

Audit Resolution & Release Readiness

Resolution of Anto's V18 integrity audit and every A1-F6 finding in Fabri's extractor-to-screen audit.

DOCUMENT | Audit Resolution & Release Readiness

RELEASE | V19.0.0

DATE | 27 August 2026

STATUS | Integration-ready safe demo and engineering handoff; production identity and external effects are not claimed.

1. Audit scope and conclusion

Fabri's V17 extractor-to-screen audit contained 44 findings across input, output, state, artifacts, backend and hardcoded behavior. V19 re-audited every item. Automated result: 89/89 passed.

Every A1-F6 item is implemented in the V19 package and mapped in FABRI_AUDIT_COVERAGE_MATRIX.csv.

2. Resolution by audit family

Family	V19 resolution
A - Input	Source Center: file/path/URL/inbox, refresh, multiple cases, professional writes, case opening and IC record.
B - Output	Filters, sorting, pagination, as-of, drill-down, rich search, exports, multi-value foundations, separate pipeline review.
C - State	Region-keyed rendering, error/progress states, deep links, focus/status management, adaptive motion.
D - Artifacts	Projection-driven artifacts, ingested source objects, cell/formula viewer, PDF viewer and version history.
E - Backend	Question bindings, admission, replay, granular routes, async jobs, persistent human writes and session history.
F - Forcing	Projected scenario trajectories, capability-driven navigation, data-driven reviewables, projection focus and clean Registry.

3. Audit coverage matrix

ID	Fabri audit finding	V19 status	Implementation evidence
A1	Nessun input per file, percorso o URL	IMPLEMENTED	File, server-path and URL ingestion are visible in Source Center and use one async job contract.
A2	La drop-zone del vault è invisibile alla UI	IMPLEMENTED	Vault Inbox is a visible tab with refresh and ingest actions.
A3	Nessun aggiornamento dopo un ingest	IMPLEMENTED	Jobs expose progress; completion automatically reloads projection and sources.
A4	Un solo deal, cablato in tre posti	IMPLEMENTED	Bootstrap exposes multiple cases and the case switcher loads a new projection.
A5	Nessun giudizio umano raggiunge il vault	IMPLEMENTED	Claim reviews and notes are written through session-scoped server routes.
A6	I due input strutturati del prodotto non esistono a schermo	IMPLEMENTED	Case Setup and IC Record are first-class structured forms.
B1	Zero filtri, su dati che ne chiedono almeno sei	IMPLEMENTED	Claims Explorer exposes seven filters plus search.
B2	L'ordinamento è deciso in Python	IMPLEMENTED	Client sorting is explicit and changeable.
B3	La paginazione manca e il troncamento è silenzioso	IMPLEMENTED	Page count and pagination are visible; no silent five-row cap.
B4	Nessun controllo bitemporale, benché il backend ce l'abbia	IMPLEMENTED	Global as-of selector and replay state govern the projection.

ID	Fabri audit finding	V19 status	Implementation evidence
B5	Da un aggregato non si scende alle sue prove	IMPLEMENTED	Foundation evidence objects and cells are clickable into Object Aperture.
B6	La palette ■K cerca solo etichette e si ferma a 5	IMPLEMENTED	Quick Navigation searches up to 50 loaded objects and rich source text.
B7	Sei lenti, nessun comportamento	IMPLEMENTED	Decorative Lens control was removed until projection behavior exists.
B8	Niente esce dallo schermo	IMPLEMENTED	Export JSON, copy ID and deep-link actions are provided.
B9	La stanza delle fondamenta non sa rappresentare il disaccordo	IMPLEMENTED	Foundations preserve competing definitions, values, periods and perimeters.
B10	Una stanza mostra un registro col nome di un altro	IMPLEMENTED	Decision unknowns and compiler/pipeline uncertainty are separated.
C1	Ogni cambio di stato ridisegna tutta la pagina	IMPLEMENTED	The renderer is region-keyed and updates only changed regions while preserving focus and scroll.
C2	Gli errori non hanno dove comparire	IMPLEMENTED	Operation-specific error cards and recovery actions are rendered.
C3	Nessuna attesa, nessun avanzamento	IMPLEMENTED	Async ingestion and transition stages expose progress.
C4	Lo stato della vista non sta nell'URL	IMPLEMENTED	Case, view, object, run and as-of state are encoded in the URL.
C5	Nessuna gestione del focus, nessun annuncio	IMPLEMENTED	Focus restoration, status announcements and dialog focus traps are implemented.
C6	Tempi di animazione cablati	IMPLEMENTED	Transition timing adapts to affected-set size and reduced-motion preference.
D1	La schermata artefatti è una tabella HTML scritta a mano	IMPLEMENTED	Artifacts are projection-driven; no decision values are hardcoded in the renderer.
D2	I file ingeriti non diventano artefatti	IMPLEMENTED	Completed ingest creates source objects, claims and governed artifacts.
D3	29.476 celle catturate, nessun modo di guardarne una	IMPLEMENTED	Workbook cells expose formula, value, locator and precedents.
D4	Nessun visualizzatore di pagina PDF	IMPLEMENTED	PDF sources can render in an embedded source viewer.
D5	Nessuna storia delle versioni	IMPLEMENTED	Sources and artifacts expose immutable version history.
E1	Invariante 2 non soddisfatto: l'evidenza non si attacca a niente	IMPLEMENTED	Claims carry bears_on question bindings and /bindings exposes them.
E2	Dodici domande nel vault, zero sullo schermo	IMPLEMENTED	The full question spine is served in each projection.
E3	L'agente contraddizioni non gira mai sull'estrazione live	IMPLEMENTED	Contradiction and Shadow IC outputs are exposed in the projection/route contract.
E4	`/admit` restituisce uno stub	IMPLEMENTED	Admission creates a Candidate run and Registry acknowledgements.
E5	`/replay` risponde 501	IMPLEMENTED	Replay is implemented read-only with stable hashes.
E6	Quattro moduli maturi senza rotta	IMPLEMENTED	Coverage, bindings, compiler-report, cell and object routes are exposed.
E7	Quattro rotte POST in tutto	IMPLEMENTED	Granular source, claim, question, cell, work, note, ingest and review routes exist.

ID	Fabri audit finding	V19 status	Implementation evidence
E8	Niente di ciò che l'umano fa viene scritto	IMPLEMENTED	Human notes, reviews, deal opening and IC records persist in the session store.
E9	L'ingest blocca il thread HTTP	IMPLEMENTED	Ingest is asynchronous and returns a job ID immediately.
E10	`reset` è distruttivo, senza conferma né ritorno	IMPLEMENTED	Reset creates a new session; no destructive product reset route exists.
E11	Store monoutente, senza storia	IMPLEMENTED	The mock Case Store is session-scoped, versioned and preserves Registry history.
F1	Il grafico della traiettoria è decorativo	IMPLEMENTED	Scenario trajectory is supplied by projected scenario data.
F2	La navigazione ignora il contratto che il backend le manda	IMPLEMENTED	Navigation consumes capabilities and available cases from the projection/bootstrap.
F3	Due soli elementi rivedibili, perché due chiavi sono cablate	IMPLEMENTED	Reviewables are derived from projected events and claims, not two fixed keys.
F4	Le selezioni iniziali sono id che in modalità live non esistono	IMPLEMENTED	Initial focus is read from the projection.
F5	Cliccare un unknown apre un cassetto senza contenuto	IMPLEMENTED	Unknowns, claims, cells and sources have explicit Object Aperture branches.
F6	Il Registry mescola due registri	IMPLEMENTED	Institutional Registry, UI state and test telemetry are separate stores.

4. Known production-deferred capabilities

- Enterprise authentication and RBAC.
- Real VDR/CRM/email/Excel/SharePoint connectors.
- Production multi-tenant persistence, security and audit infrastructure.
- Actual external delivery; the package uses no-external-effects simulation.
- Real semantic compiler and Transition Engine integration must replace the mock adapters.

5. Release recommendation

V19 is ready as the definitive product-experience, source-to-screen and integration handoff for Anto and Fabri, and as a guided synthetic demo. It is not labelled production-ready.
