

PANTA Deal World V19

Complete Product Experience, UI/UX and Integration Handoff Package

Release: 19.0.0 **Date:** 27 August 2026 **Status:** Integration-ready safe demo/reference build

V19 preserves the V18 product architecture and incorporates every applicable correction in Fabrizio's V17 Extractor-to-Screen audit. The release closes the gap between a compelling decision-system shell and the source, compiler, artifact, query, temporal and human-write capabilities needed to operate it.

Release evidence	Verified result
Automated checks	89 / 89 passed
Authoritative screens	40 individual PNGs
IA / flow / state diagrams	14 PNG + SVG pairs with editable DOT
Primary PDF documents	9
Videos	2
Fabri audit coverage	A1-F6 mapped to implementation and evidence

Operating modes

- CONNECTED - live API only; no fixture fallback.
- MOCK CONNECTED - stateful synthetic API with simulated authority and no external effects.
- OFFLINE DEMO - explicit fixture launcher; formal writes are read-only or simulated.

Core release principles

- No domain fact exists in the core UI unless it entered through a validated projection.
- Evidence is bound to typed questions and inspectable source/cell objects rather than attached generically to a deal.
- Decision unknowns and compiler/pipeline uncertainty are different registers and different UI destinations.
- Role projection, authenticated identity, authority assignment and attesting actor remain distinct.
- The frontend projects state; the authoritative services produce transitions, authority records, execution packages, settlement and replay.

Package structure

Folder	Purpose
00_START_HERE	release navigation, manifest, inventory and checksums
01_PRODUCT_BUILD	application, stateful mock API, explicit fixtures and launchers
02_PRODUCT_EXPERIENCE	product specification, guide and annotated atlas
03_SCREEN_ATLAS	one authoritative image per screen/state
04_INFORMATION_ARCHITECTURE_AND_FLOWS	IA, flows, state, service and data lineage
05_DESIGN_SYSTEM_AND_INTERACTION	tokens, components, content, motion, responsive and accessibility
06_RESEARCH_AND_VALIDATION	audits, resolution matrix, research plan and metrics
07_ENGINEERING_CONTRACTS_AND_ADAPTERS	schemas, API reference and integration adapters
08_TEST_EVIDENCE	automated and categorized release evidence
09_DEMO	demo scripts, screenshots and videos
10_REFERENCE_ARCHIVE	superseded release notes and concept references

Primary documents

- 02_PRODUCT_EXPERIENCE/PANTA_V19_Product_Experience_Specification.pdf
- 02_PRODUCT_EXPERIENCE/PANTA_V19_Product_User_Guide.pdf
- 02_PRODUCT_EXPERIENCE/PANTA_V19_Annotated_Screen_Atlas.pdf
- 04_INFORMATION_ARCHITECTURE_AND_FLOWS/PANTA_V19_Navigation_Flows_and_State_Model.pdf
- 05_DESIGN_SYSTEM_AND_INTERACTION/PANTA_V19_UI_System_and_Engineering_Handoff.pdf
- 06_RESEARCH_AND_VALIDATION/PANTA_V19_UX_Research_and_Validation_Plan.pdf
- 06_RESEARCH_AND_VALIDATION/PANTA_V19_Audit_Resolution_and_Release_Readiness.pdf
- 08_TEST_EVIDENCE/PANTA_V19_Test_Evidence_Report.pdf

Production boundary

- No production authentication or enterprise RBAC is claimed.
- No real external action is emitted by the included mock service.
- No enterprise database, retention or security infrastructure is claimed.
- Fabrizio compiler and Anto Transition Engine production endpoints remain explicit adapters.

Integrity files

`PACKAGE\_INVENTORY.csv` lists every payload file. `CHECKSUMS.sha256` hashes every payload file and the inventory, excluding the checksum file itself. `PACKAGE\_MANIFEST.json` is the machine-readable form of this document.

Use V19 as the authoritative implementation and UI/UX handoff. V18 remains inside the user delivery as a separately verified historical baseline.
